

Vulkoprin nv – CNC-turner

CNC-turner

As a CNC turner, you are responsible for:

- Starting up, operating, and setting up CNC-controlled machining machines (Fanuc control program)
- Measuring, setting up, and inputting cutting tools
- Accurately measuring and working with zero-point determination
- Conventional turning

Who is the ideal candidate?

You have:

- a degree in mechanical shaping techniques/CNC turning OR equivalent experience
- good knowledge of Fanuc controls and machining techniques
- Understanding of the impact of feed rate, cutting speed, and cutting depth on the machining process
- the ability to read and correct ISO programs and interpret technical drawings
- the ability to work independently as well as in a team
- a good knowledge of Dutch OR English

What is in it for you?

At Vulkoprin, an established family business with 60 years of experience, participation and diversity are central to our company culture. Our close-knit teams across various departments are the backbone of our success. Located in the heart of West Flanders, we not only offer an attractive salary and additional benefits as part of the metal sector (PC111), but also a stimulating environment where your growth and development are encouraged.
